To Whom It May Concern:

Subject: Material Safety Data Sheet For Water Extinguishers

From time to time we receive requests to provide a Material Safety Data Sheet, MSDS, for the water in pressurized water extinguishers. It is impossible for us to do so as we, by law, ship all of these extinguishers empty. These extinguishers are filled either by a fire equipment distributor or the end user.

If you are in need of a MSDS for the water that is in your extinguisher, you will have to go to your local water utility for it.

Sincerely,  
Tyco Safety Products,

Mitchell J. Hubert  
Manager, Agents Chemistry  
Research & Development
